

### Our Purpose

To reach out to the at-risk youth and provide them with opportunities of growth, nutrition and knowledge. We will serve this population and provide an alternative to drugs, gangs and crime which so often is the prevailing choice for today's youth.

## FEEDING THE 5000

Nutrition. Technology. Education.  
"Feeding The Core"

Feeding 5000, Inc. is a non-profit (501c3) charity that exists to service "at-risk" youth populations by providing nutrition, technology and education at no cost which in turns provides hope and growth alternatives for future generations.

In the spirit of the "No Child Hungry" Kansas City Campaign, it is Feeding the 5000's aspiration to identify key supporters in the Kansas City areas who want to pledge to end hunger.

### Feeding The 5000 Organizational Goals

To provide nutritious meals to at-risk youth in inner city  
and rural communities.

To provide educational tutoring and technology  
options for the at-risk youth.

To increase the digital capabilities of today's at-risk  
youth.

To raise funds for the development and maintenance  
of enrichment activities for at-risk youth.

To expand the horizons and opportunities for the  
at-risk youth population.

To provide enrichment activities designed to increase  
individual self-esteem.

*FEEDING THE 5000, INC. is a nonprofit charity located in  
Grandview, Missouri. All donations are fully tax deductible under the  
extent of all IRS rules and laws. The tax identification number is*

*27-2884864*

### Nutrition

The mission is to provide food for At-risk youth up to the age of 18. We aim to identify facilities that offer a gateway into the communities that are home to the At-risk youth. We provide facilities with federally approved & nutritious meals for preschool and post school hours at no cost.

### Technology

We work with companies wishing to donate their old computer equipment to the cause of educating at risk youth on technology and closing the digital divide which exists in America. We then identify youth interested in computers and provide them with a computer. and then educate and train on software and hardware usage/ concepts.

### Education

The Federal "No Child Left Behind" Act enables low-income parents to obtain free tutoring services to expand options for their children who may be struggling in school. We strive to build confidence and proficiency in math, reading, language arts, and science. We provide tutoring services to kids K-12 throughout the year.
